

Production Skills Exploration Services

Mission

To provide person-centered services that enhances the quality of life for people with disabilities in the areas of employment, life skills and community inclusion.

ProAct provides participants with disabilities a customized approach to exploring jobs in the production field through a paid, work experience.

They will have the opportunity to learn about the field while performing actual production related duties in an integrated production center.

Production Skills Exploration, led by trained ProAct staff, helps participants gain an understanding of employment in the production field, learn about jobs in the field and are paid minimum wage to perform work on a competitive production floor. Work tolerance, follow through and work performance are evaluated on a daily basis, along with communication and interpersonal skills.

Contact Anna Cahak for more information on entrance criteria or to refer.
